

# Dwarf Pampas Grass

A photograph of Dwarf Pampas Grass. The image shows several tall, feathery white plumes of the grass, which are the characteristic seed heads. The plumes are set against a background of dense green foliage, including what appears to be a large green plant on the left and a dark green tree or shrub on the right. The lighting is bright, highlighting the texture of the white plumes.

- **Compact Grass**
- **Deer Resistant**
- **Thick White Plumes appear in Summer and Remain into Winter**
- **Growth: 4-5 Ft. Tall and 3-4 Ft. Wide**
