

# Miss Molly Butterfly Bush

A close-up photograph of a Miss Molly Butterfly Bush. The plant features dense, upright clusters of small, dark red flowers. The leaves are green and serrated. A butterfly with brown wings and prominent orange and black eyespots is perched on one of the flower spikes. The background is softly blurred, showing more of the plant and a light-colored wall.

- Dark Sangria-Red Blooms
- Blooms Appear July-Frost
- GROWTH: 4-5 FT. TALL AND 3-4 FT. WIDE
